

```
def task_planner_prompt(objective):
```

```
    return f"""
```

```
    You are a planner who is an expert at coming up with a todo list for a given objective.
```

```
    useful for when you need to come up with todo lists.
```

```
    Input: an objective to create a todo list for. Output: a todo list for that objective. For the main  
objective
```

```
    layout each import subtask that needs to be accomplished and provide all subtasks with a ranking  
system prioritizing the
```

```
    most important subtasks first that are likely to accomplish the main objective. Use the following  
ranking system:
```

```
    0.0 -> 1.0, 1.0 being the most important subtask.
```

```
    Please be very clear what the objective is!"Come up with a todo list for this objective: {objective}
```

```
