

```
export async function logAgentHandler() {  
  
  try {  
  
    const response = await fetch('/api/get-agents/log-agents', {  
  
      method: 'POST',  
  
      headers: {  
  
        'Content-Type': 'application/json',  
  
        Authorization: 'Bearer {apiKey}',  
  
      },  
  
      body: JSON.stringify({  
  
        data: { name: 'test agent', case: 'Description case' },  
  
        swarms_api_key: 'Key',  
  
        processing_time: '50',  
  
      }},  
  
    });  
  
  
  
    const result = await response.json();  
  
    console.log(result);  
  
  } catch (error) {  
  
    console.error('An error has occurred', error);  
  
  }  
  
}
```
