

```
import nodemailer from 'nodemailer';

import SMTPTransport from 'nodemailer/lib/smtp-transport';

const mailer = () => {

  const config: SMTPTransport.Options = {

    host: process.env?.SMTP_HOST || "",

    port: Number(process.env?.SMTP_PORT) || 587,

    secure: true, // Use `true` for port 465, `false` for all other ports

    auth: {

      user: process.env.SMTP_USER,

      pass: process.env.SMTP_PASS,

    },

    service: 'aws',

  };

  return nodemailer.createTransport(config);

};

export default mailer;
```
