

```
export function getMonthRange(month: Date) {  
  
  const date = new Date(month);  
  
  const monthStart = new Date(date.getFullYear(), date.getMonth(), 1);  
  
  const monthEnd = new Date(date.getFullYear(), date.getMonth() + 1, 0);  
  
  
  const formattedMonthStart = `${monthStart.toLocaleString('default', { month: 'long' })} 1`;  
    const formattedMonthEnd = `${monthEnd.toLocaleString('default', { month: 'long' })}  
  ${monthEnd.getDate()}`;  
  
  
  return `${formattedMonthStart} - ${formattedMonthEnd}`;  
  
}
```
