

```
import { createBrowserClient } from '@supabase/ssr';

import { Database } from '@types_db';

// Define a function to create a Supabase client for client-side operations

export const createClient = () =>

  createBrowserClient<Database>(

    // Pass Supabase URL and anonymous key from the environment to the client

    process.env.NEXT_PUBLIC_SUPABASE_URL!,

    process.env.NEXT_PUBLIC_SUPABASE_ANON_KEY!,

  );
```
